

TEKTELIC Waterproof Cable Protection Kit

Quick Application Guide

WHAT IS IT FOR?

TEKTELIC Waterproof Tape Kit is designed to provide a quick, reliable, and waterproof seal for cable connectors. Whether you're installing outdoor IoT gateways, devices, repairing exposed connections, or protecting cables in wet or harsh environments, this kit ensures durability and performance. The self-fusing silicone tape bonds to itself without adhesive, forming a seamless, airtight seal.

KIT INCLUDES: 1 METER OF SILICONE FUSING TAPE, 2 ALCOHOL WIPES

HOW TO USE THE KIT

- 1. Clean the Surface:**
 - Use the included alcohol wipes to clean connectors and the surrounding areas.
 - Ensure surfaces are dry before proceeding.
- 2. Prepare the Tape:**
 - Cut approximately 50 cm of tape per connector.
 - Remove the protective backing from the tape.
- 3. Wrap the Tape:**
 - Begin wrapping the tape tightly around the connector, overlapping each layer by 50%.
 - Stretch the tape as you wrap for a strong and waterproof bond.
- 4. Finish the Seal:**
 - Cover the entire connector, extending slightly onto the cable for added protection.
 - Press the tape firmly to ensure it bonds and fuses securely.

WATERPROOF PROTECTION

Ideal for outdoor or high-moisture environments.

EASY APPLICATION

Self-fusing tape requires no additional tools or adhesives.

VERSATILITY

Suitable for sealing connectors, cables, and small repairs.
